

PROJECT REPORT

Page County High School

CLIENT:	Page County High School
LOCATION:	Luray, Virginia
ARCHITECT:	Fanning/Howey Associates, Inc.
CONTRACT:	\$25.5 million
FINISH DATE:	May 2009

Special Features: The design recommended construction of identical 750-student high schools for grades 9-12.

Both Page and Luray schools will feature 500-seat auditoriums, 1,150-seat gymnasiums, and cafeteria/food service facilities that will accommodate an immediate enrollment of 750 as well as future expansion to 900 students. Both schools are also designed to incorporate six "shell" classrooms as a bid alternative.

The classrooms will accommodate anticipated growth, with build-out to take place as needed, a highly cost-effective way to plan for the future.

Recommendations for bid alternatives also included the construction of auxiliary gymnasium/wellness areas at each new school to provide additional physical education space as well as much-needed community recreational facilities.
